

Part I — Foundations of Analysis	5
Introduction: Principles Worth Understanding	5
Analysis Tools: TradingView	6
Quick Guide to Using TradingView	6
Introduction to Japanese Candlestick Analysis	8
Break of High and Low — The Foundation of Structure.....	10
Price Impulses	10
PART II — Market Structure	13
Uptrend	13
Downtrend.....	14
Range (Consolidation).....	14
Deviations within the Range.....	15
How to identify a range earlier?.....	15
Why is range analysis challenging?	17
Price behavior after a deviation.....	17
Market Structure and Identifying Structural Points.....	18
Break of Structure (BoS).....	18
Change of Character (ChoCh)	19
False ChoCh.....	20
Double ChoCh	20
ChoCh and BoS.....	20
Inducement (IDM)	21
IDM in an Uptrend	21
Example of Interpretation:	21
Placing the First Structural Point.....	22
Updating the IDM as New Highs Form	23
IDM in a downtrend	24
Method for Determining Market Structure	24
Importance of Candle Close	26
Uptrend — IDM Update After Confirmed BoS	27
Determining Market Structure	28
Continuation of the Market Structure Process	29
Trend direction change after confirmed ChoCh	32

Marking a structural point after trend change-----	32
Continuation of the market structure process -----	33
Unusual Situations in Market Structure -----	37
PART III — Zones of Interest -----	40
Imbalance -----	40
How to Identify an Imbalance? -----	40
Imbalance in a Downtrend-----	41
How Imbalance Appears in a Downtrend? -----	41
Why Imbalance Attracts Price? -----	42
Imbalance in an Uptrend-----	43
How Imbalance Appears in an Uptrend?-----	43
Why Price Returns to the Imbalance? -----	43
The next zone of interest is the order block (OB)-----	45
Order Block in an Uptrend -----	45
Alternative Example — Order Block in an Uptrend -----	46
Order block in a downtrend-----	47
Alternative Example — Order Block in a Downtrend -----	48
Liquidity-----	49
Internal vs. External Liquidity -----	49
Liquidity in Trends -----	50
IDM as a Form of Liquidity -----	51
Liquidity from a “Knee” -----	51
EQLs and EQHs — Equal Lows and Equal Highs -----	52
Trap Block (SMT) -----	53
Consolidation as a Liquidity-Gathering Zone -----	55
PART IV — Fibonacci Support Tools -----	57
50% Level — Impulse Equilibrium Point-----	57
OTE Zone (Optimal Trade Entry) — Educational Perspective -----	57
Deep Corrections — 90–100% of the Impulse -----	58
Discount and Premium Zones According to Fibonacci — Educational Perspective ---	58
PART V — Practical Analysis-----	63
How to train analysis — practical exercises -----	63
Complete analysis process according to the book’s methodology -----	68
